Committee & Task Force Reports

Online Learning Research Committee

The Online Learning Research Committee is planning a new research project. The project will focus on library use and interactions in the disciplines of Education and Psychology. Things we hope to explore include types of resources that are being used, what kinds of instruction are being provided, and how this might look differently depending on whether the user is an undergrad, a graduate student, or a faculty member. We will be sending out a survey sometime this coming year so be on the lookout and we hope you will partake and share your experiences with us.
