Marian Shaaban, new program coordinator, presented a final report by outgoing coordinator Mercy Sanchez. There are currently 23 liaisons covering 26 international government organizations, yet only 3 liaisons have sent reports to Mercy. Andrea read a message from Mercy thanking IDTF for the opportunity to serve and affirming that she will continue to be involved in the program as liaison to Bernan Unipub.

Jim Church presented a proposal with the working title, "International Data: A Crash Course for the Non-Specialist." Co-sponsors to date include GODORT, IASSIST, WESS, and BRASS. There is a partial list of speakers, but more will be solicited. After some discussion, the working title was amended to "International Statistical Data: A Crash Course."

Since the Midwinter Meeting, Northwestern University asked that the IDTF web pages be removed from their server. Because of unfortunate circumstances, the former coordinator and webmaster wasn't able to assist at all with this process. After consulting IDTF members via e-mail, Andrea Morrison then moved, updated, and maintained the IDTF pages at Indiana University. Points of discussion were: responsibilities of the IDTF coordinator, webmaster, and authorsmaintenancecontentand creation of a web oversight group within IDTF. Another point of discussion was where the web pages should be and who should be the webmaster. Observations and comments made during the discussion:

- Mike McCaffrey-Noviss created an excellent site in his role as past IDTF coordinator and webmaster, and IDTF should continue to take advantage of his talents and knowledge.
